

HPE GreenLake Flex Capacity

Get the best of both worlds—on premises and pay per use —with elastic capacity, enterprise support

Business leaders expect to consume IT

By 2020, consumption-based procurement in datacenters will account for as much as 40% of enterprises' IT infrastructure spending¹

Leaving IT with a dilemma

How do I give the business what they need while keeping proper control of our apps and data?

If we could have a consumption experience on premises ...

Pay per use

Flexible, pay per use, model

Faster value

Curated solutions that evolve ahead of your needs

Simplified IT

Operated for you to add business value

Proper control

In your IT environment – from the core to the edge

Why choose?

With HPE GreenLake Flex Capacity, you can have it all.

Now you don't have to choose between the pay-as-you-go scalability of the cloud
and the reassurance of on-premise IT.

Fast, cost effective, scalable, secure. Why choose, when you can have it all.

HPE GreenLake Flex Capacity

A public cloud-like experience in the privacy of your own data center

- When you need to get started quickly, and grow just ahead of demand
- When large capital outlays and long procurement cycles no longer fit your business;
- When you want to pay for what you use
- When you need IT capacity ready for your next project or customer
- For your data and workloads that should stay on premises, under your control
- When you need to simplify IT operations

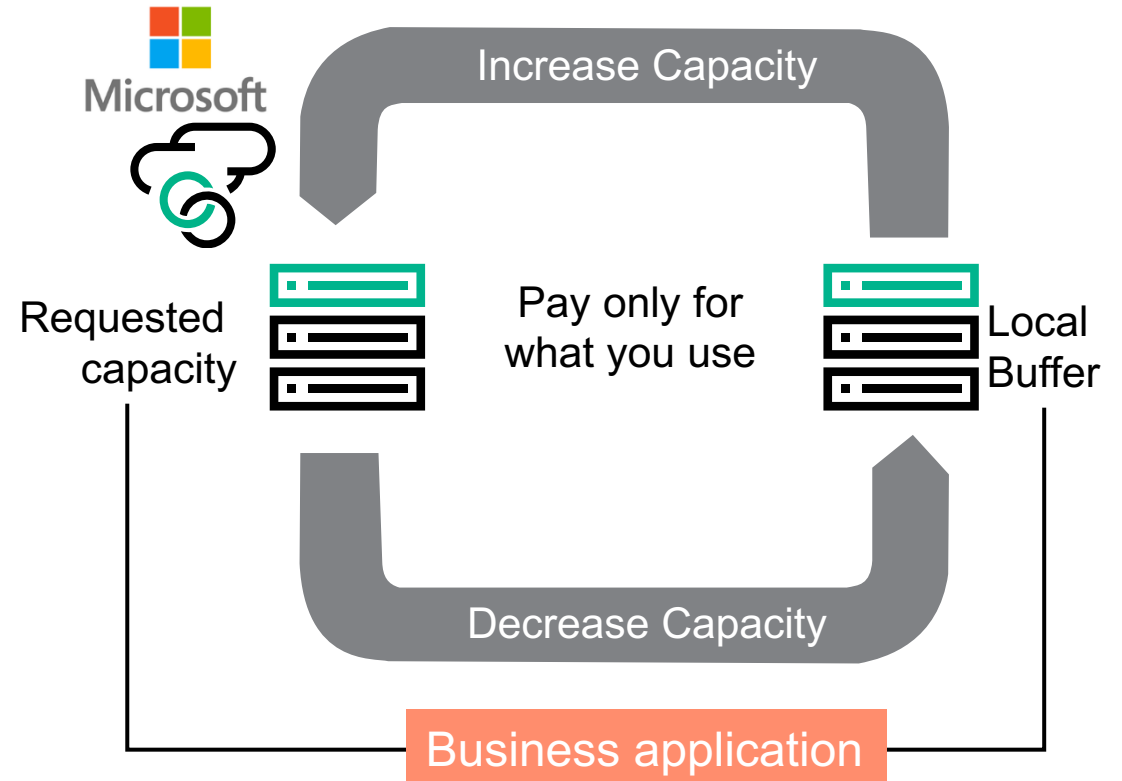

HPE: Leading in consumption-based IT

What HPE GreenLake Flex Capacity delivers

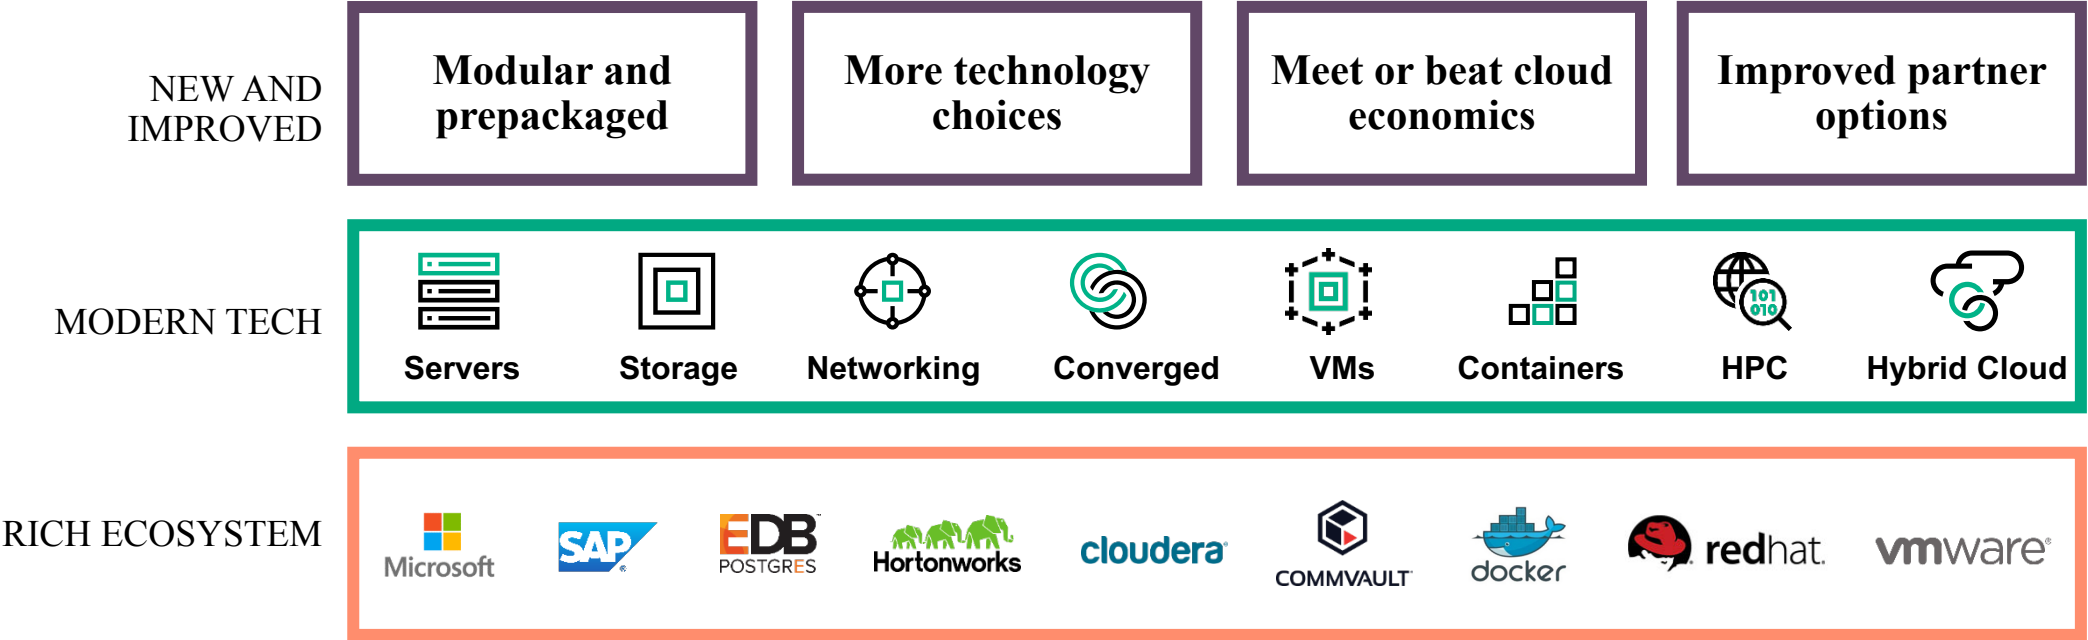

Elastic capacity, enterprise support, for Hybrid IT

- Pay only for what you use
 - Meet or beat cloud economics
 - Aligns costs with usage monthly via advanced metering
 - No upfront payment
 - Save the costs of overprovisioning
- Infrastructure capacity that never runs out
 - Scalable – add available capacity in minutes, not months
 - Avoid long procurement cycles
 - Manage capacity jointly with account team
- Applies to wide range of infrastructure
 - HPE and multivendor support
 - Hybrid-ready with certain Microsoft Azure services
- Common use cases: Azure Stack, Storage, HPC, Containers, VMVending, composable infrastructure

HPE GreenLake Flex Capacity

The next evolution of consumption-based infrastructure

Accounting rules are changing

New rules

- FASB & IASB have converged on a new definition of a lease.
- Leases now must be on the customer balance sheet.

Timing

- Deadline to change accounting treatment 2019, but most large enterprises began in 2016.

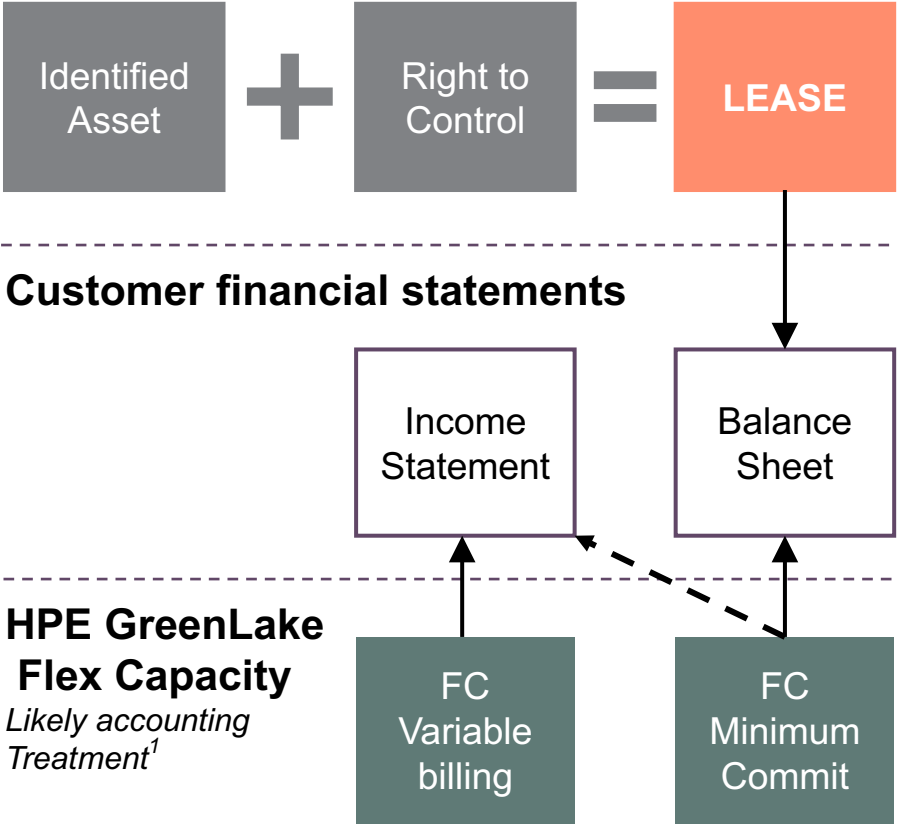

Impact for HPE GreenLake Flex Capacity

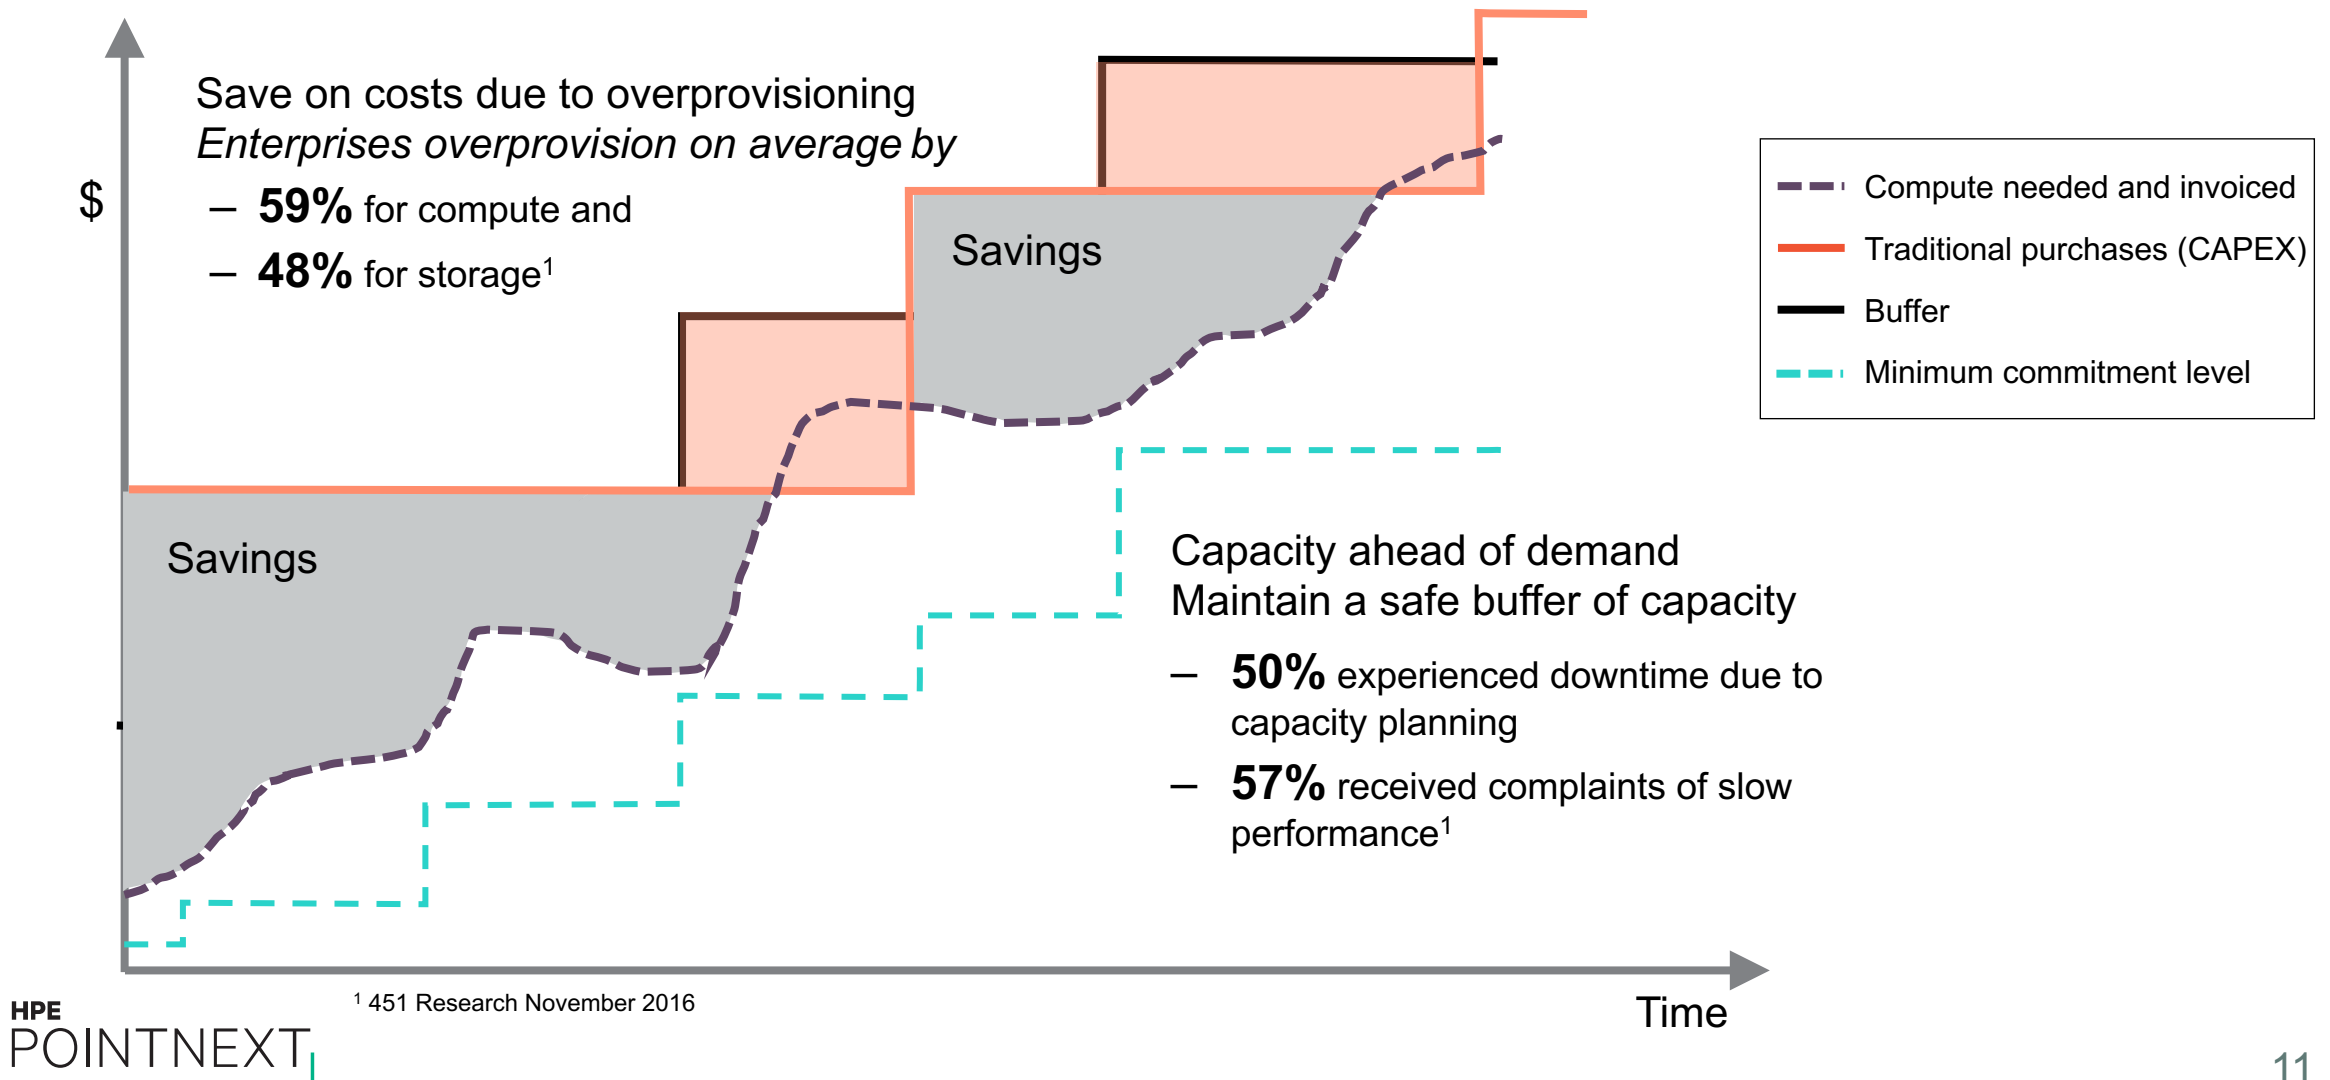

- HPE GreenLake Flex Capacity variable component likely treated on income statement¹
- Minimum commitment depends on asset control²
- HPE GreenLake solutions more likely to be treated on income statement¹

Note 1 Customers must determine their own accounting treatment; consult your financial advisor
Note 2 Minimum commit may be Income Statement if right to control is determined not to sit with them

New Lease Definition

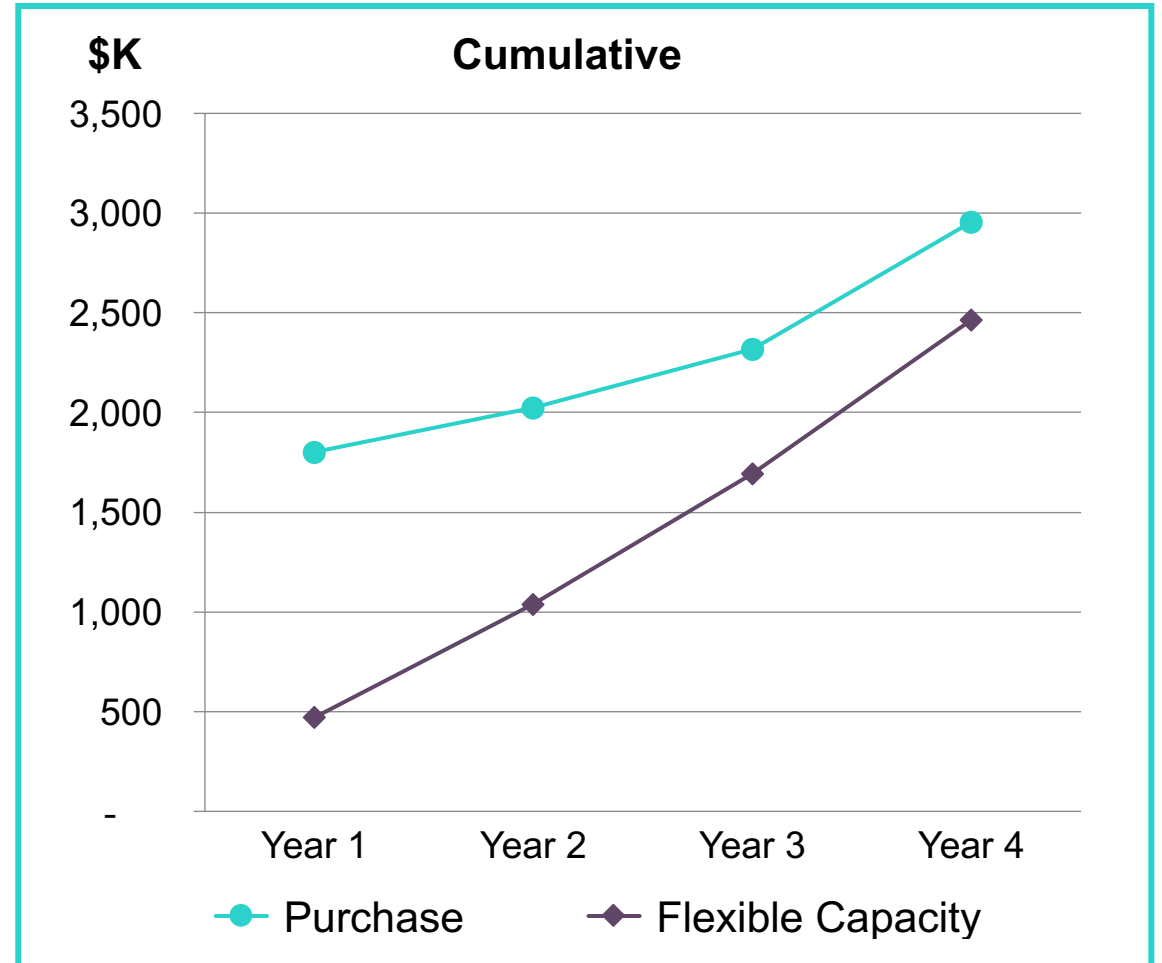

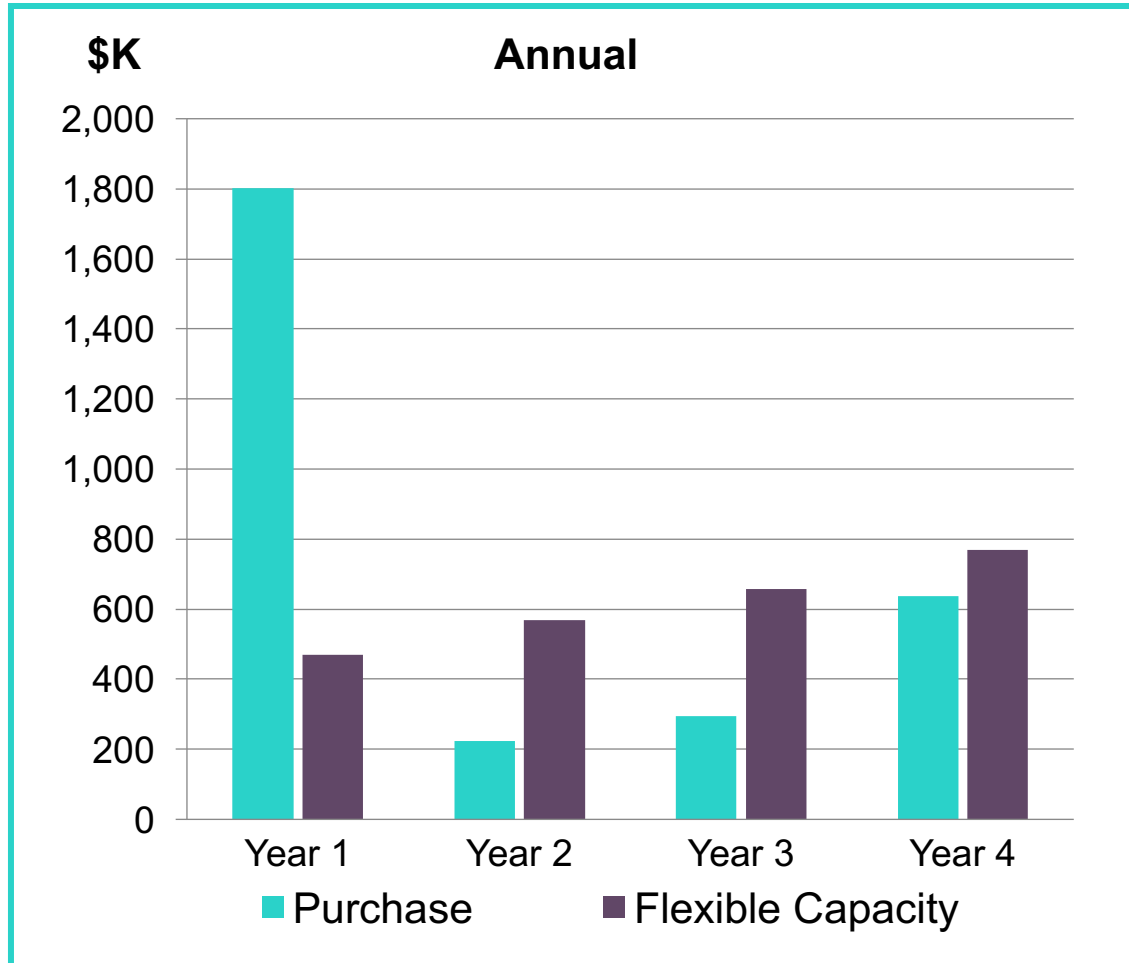

How HPE GreenLake Flex Capacity benefits IT

HPE GreenLake Flex Capacity cash flow comparison

Infrastructure as a Service—medium configuration example

For Illustrative Purposes Only

HPE GreenLake Flex Capacity options

Monthly payment can include¹

- Servers
- Storage
- Networking
- Software
- Services
- Synergy
- 3rd party products
- Software Defined Storage / Hyperconverged
- Flexible VM metering, monitoring, billing
- Containers on demand
- High Performance Compute
- Microsoft Azure and Azure Stack svcs

Variable usage = variable payment

Servers

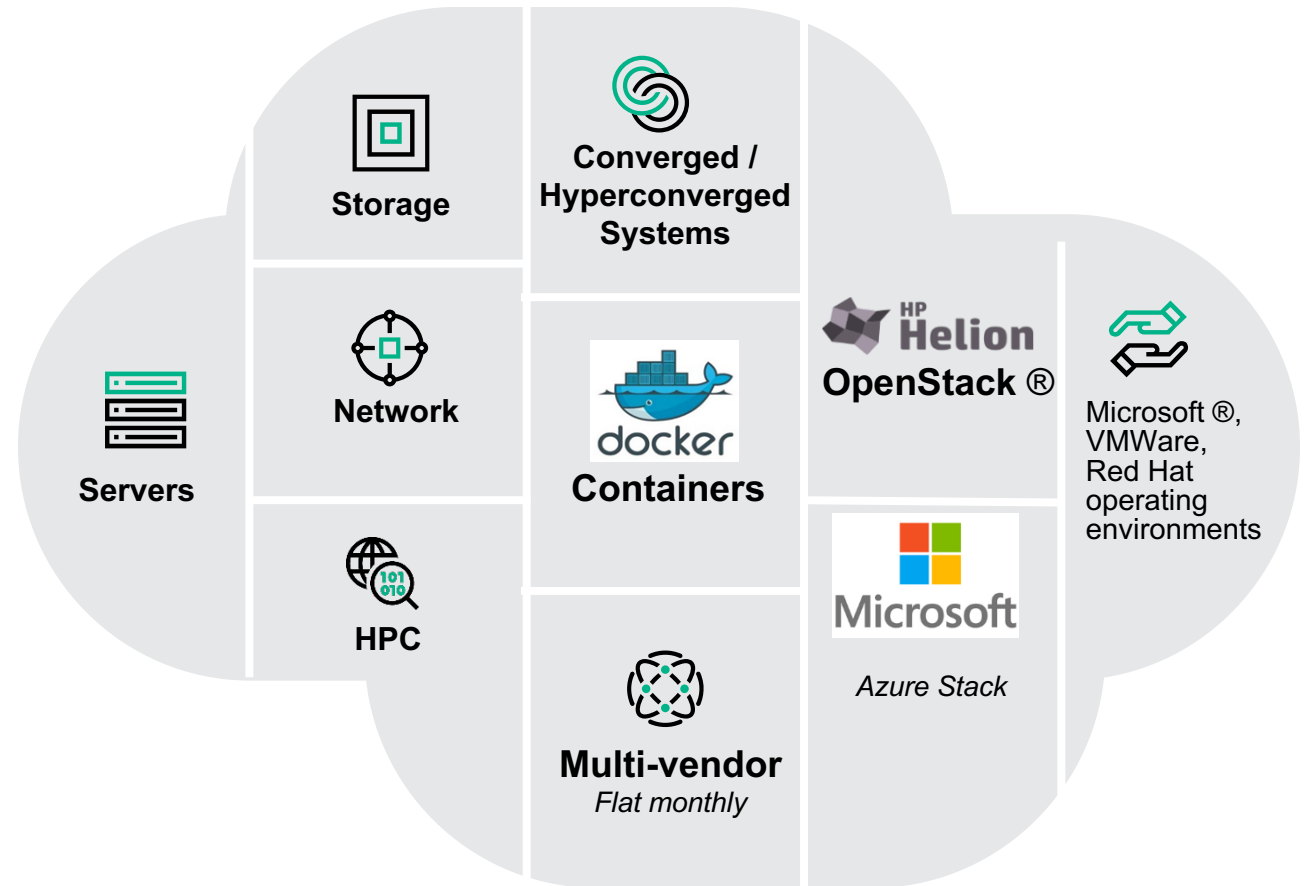

- Per server, virtual machine (by compute unit) or physical core, container node

Storage

- Per GB

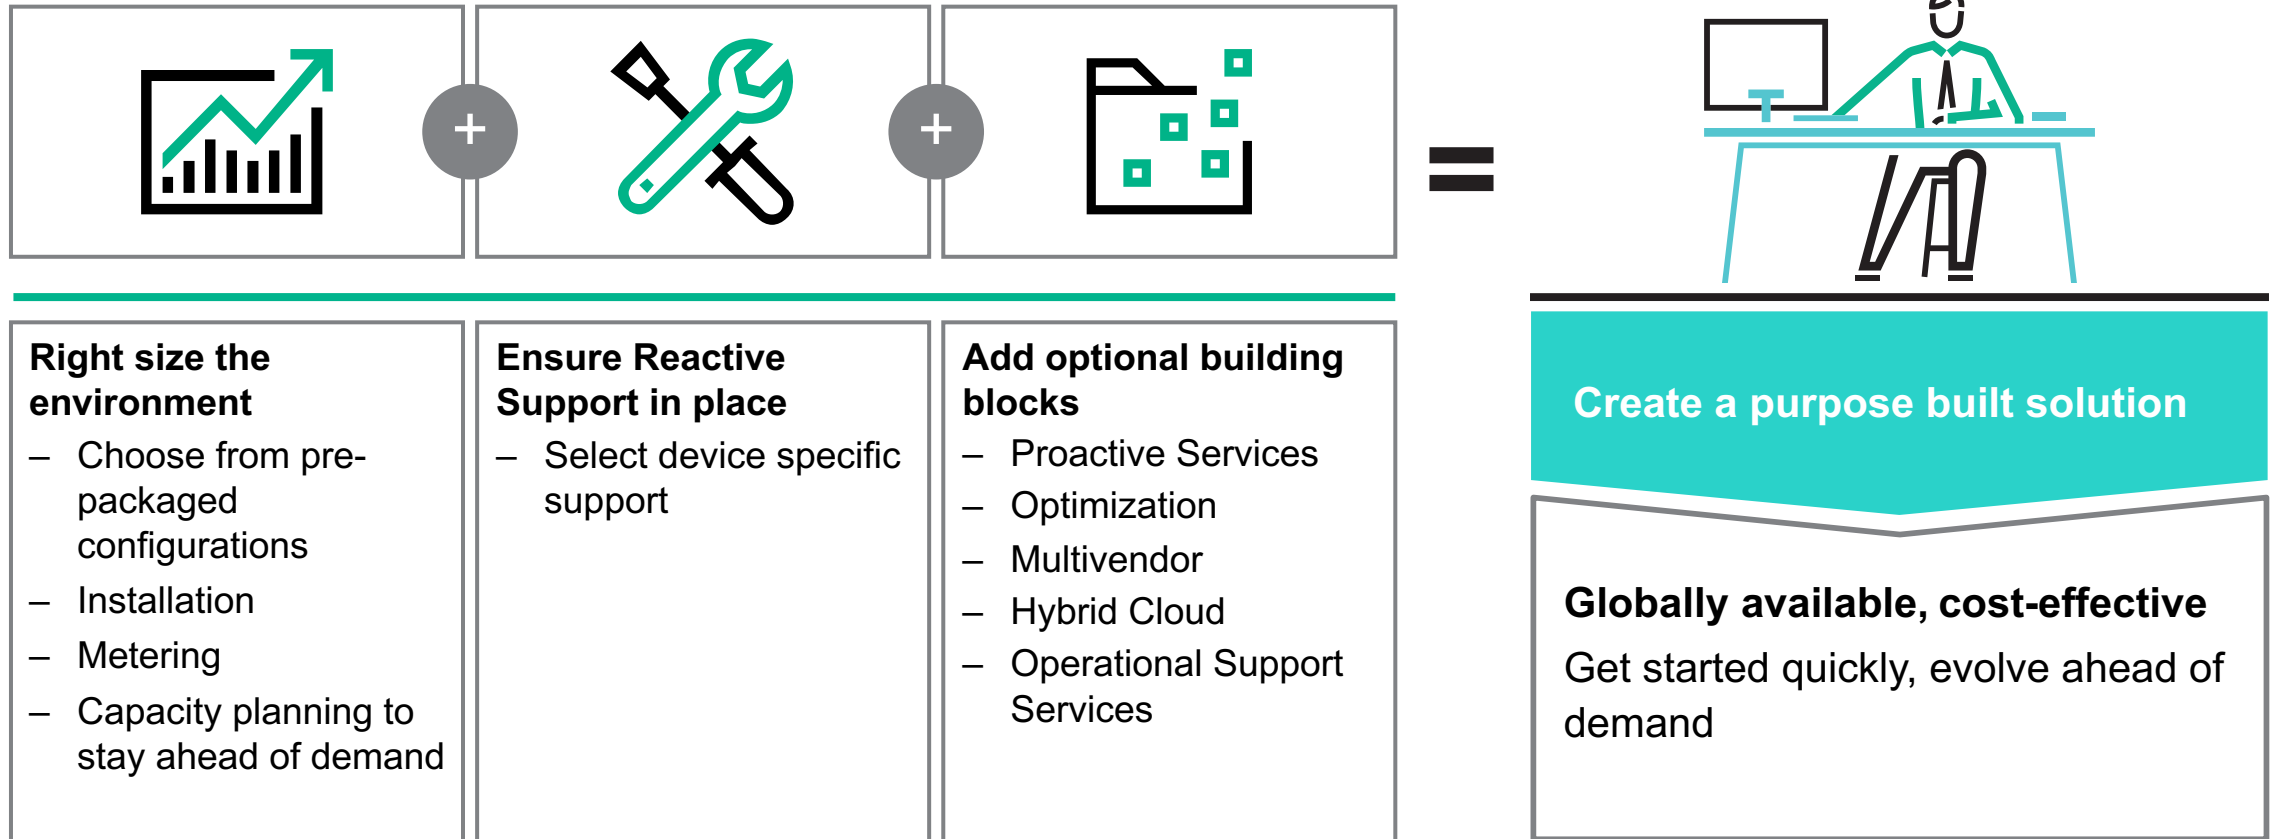

Network

- Per port, per access point

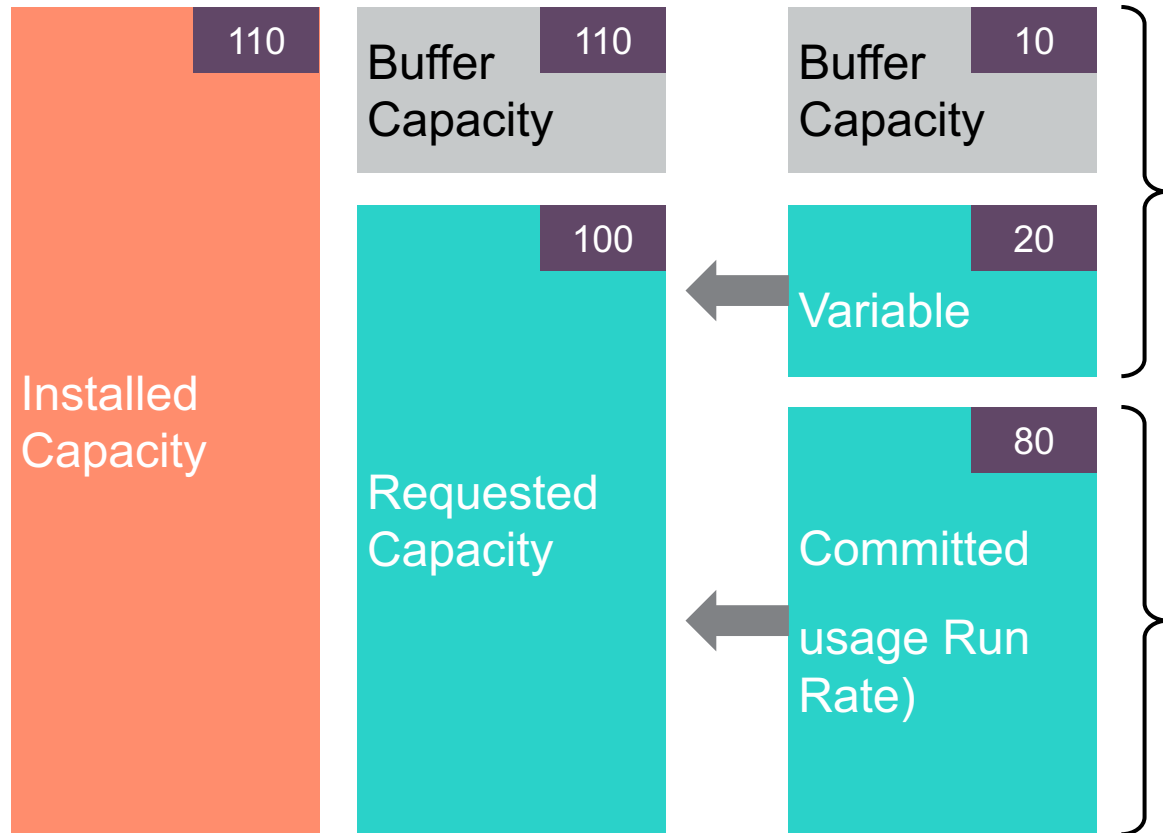

Consumption-based IT designed to suit your needs

HPE GreenLake Flex Capacity

Onboard quickly, evolve ahead of demand

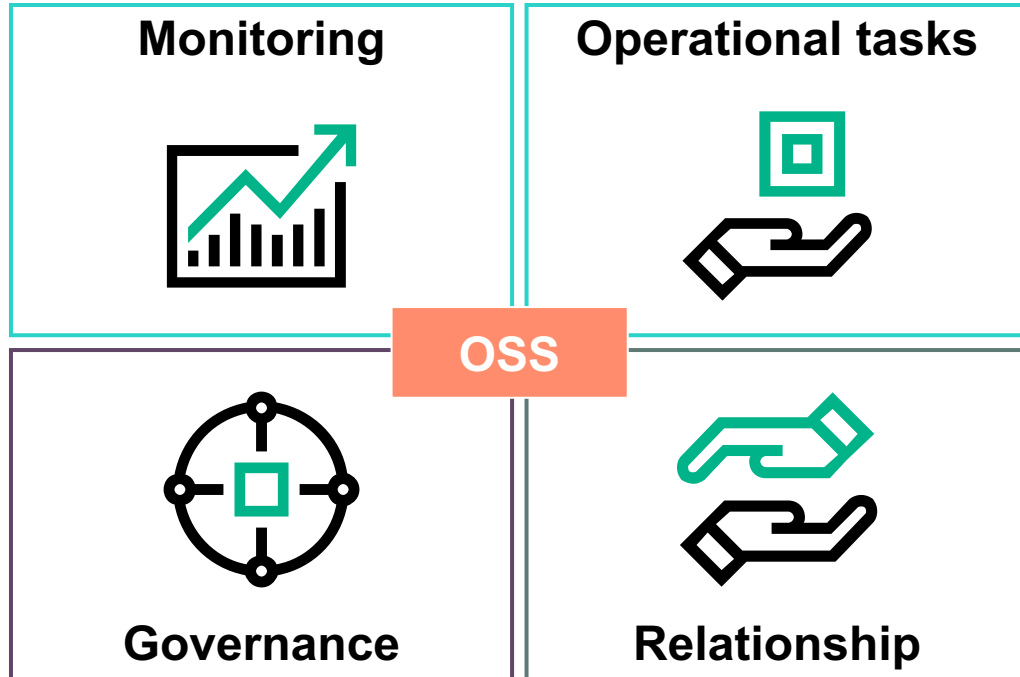

- Start with a pre-packaged configuration that meets required capacity
- We add buffer capacity that is not charged
- Establish committed usage – as agreed upon
- As you grow, use some of the buffer; monthly payment increases
- With active capacity management, we jointly plan, and increase the buffer with a simple change order

Results:

- Get started quickly with modular choices
- Add capacity in minutes, not months
- Never run out

HPE Operational Support Services

Add Infrastructure management to free your resources to grow the business

Remote Monitoring & Operations

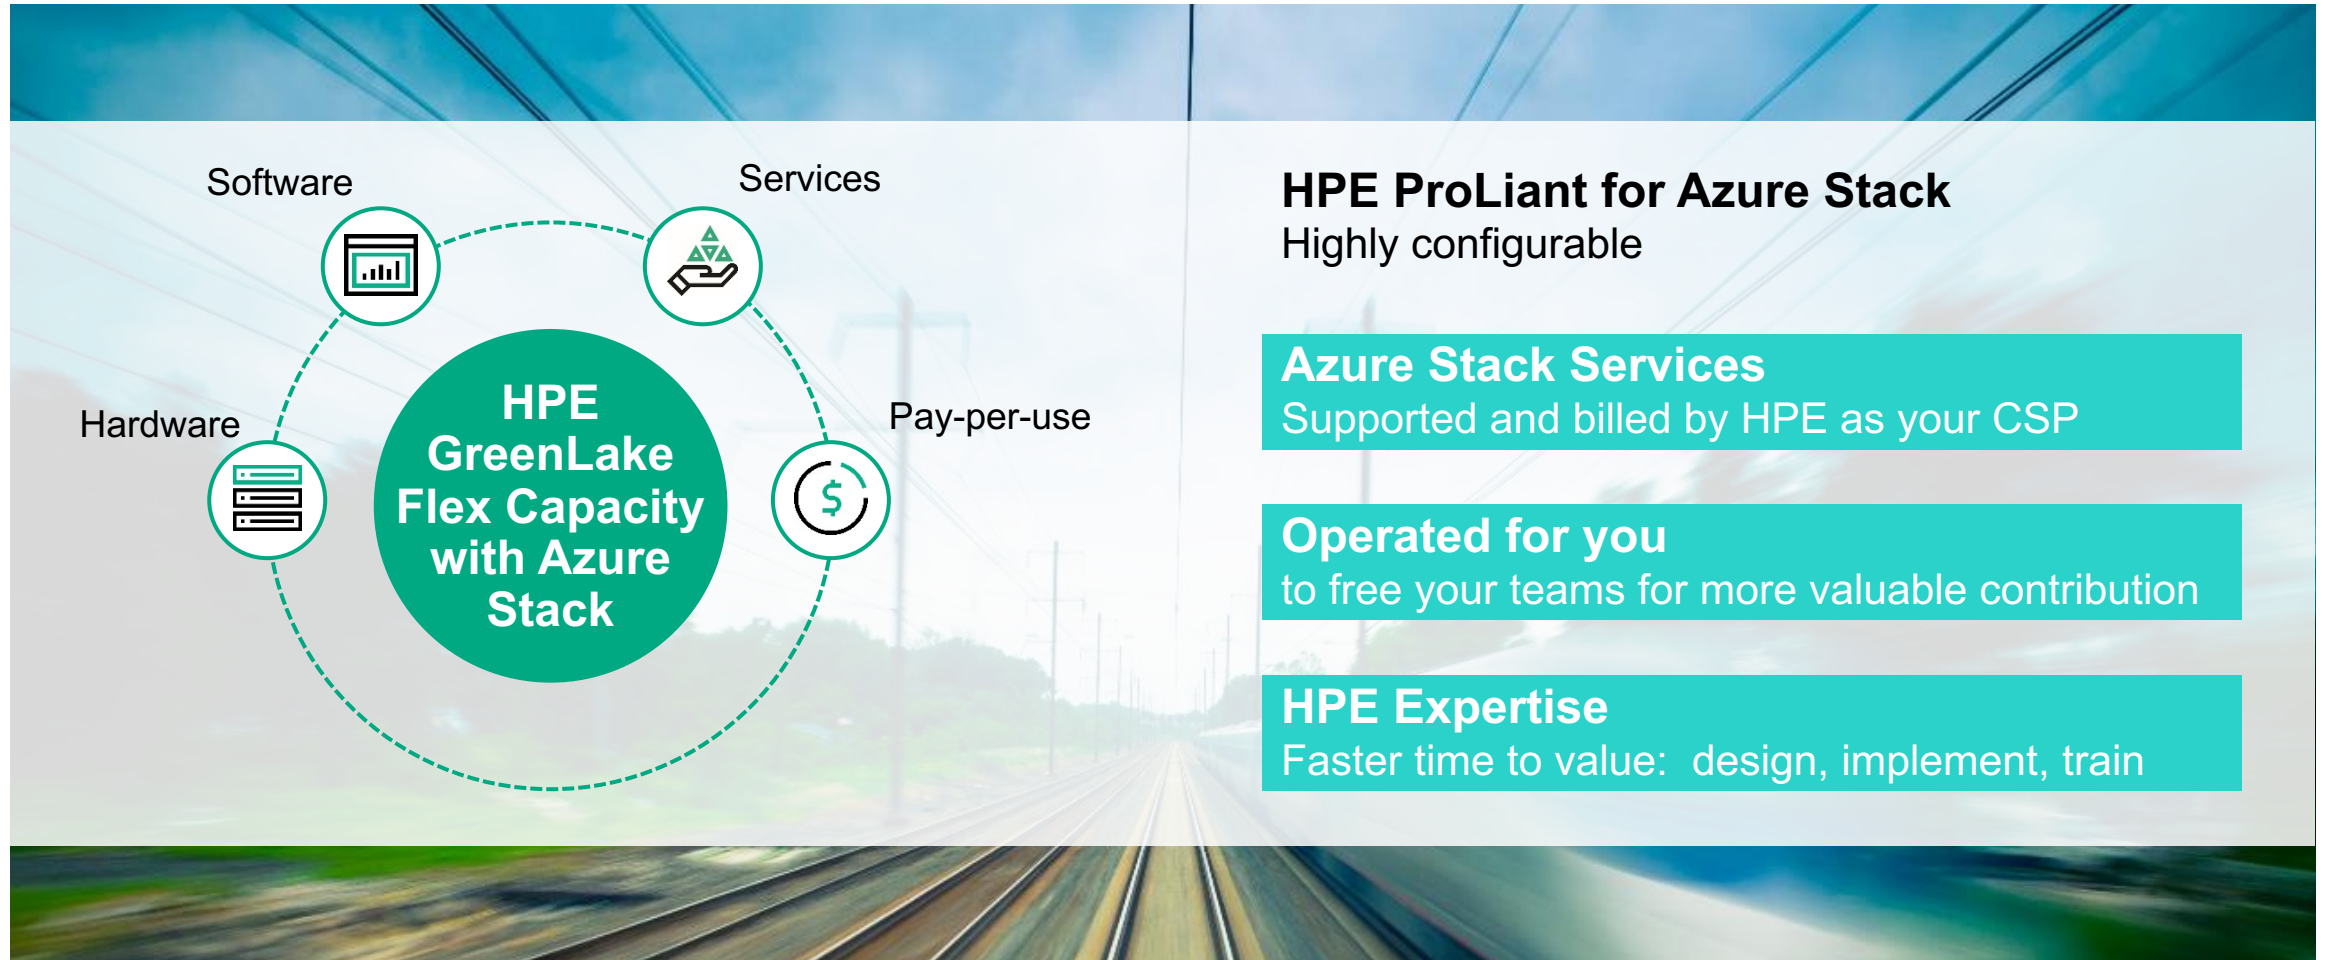

- Integrated Infrastructure Mgmt Tool Framework
- Best practices for IT Operation – based on ITIL Process
- Access to more than 5000 HPE Solution Center experts

Based on HPE Datacenter Care

- Worldclass Reactive and Proactive Support Services
- Assigned Account team backed by global resources
- Tailored to your business needs

Using Microsoft Azure Stack

Consume Azure-consistent services from your data center

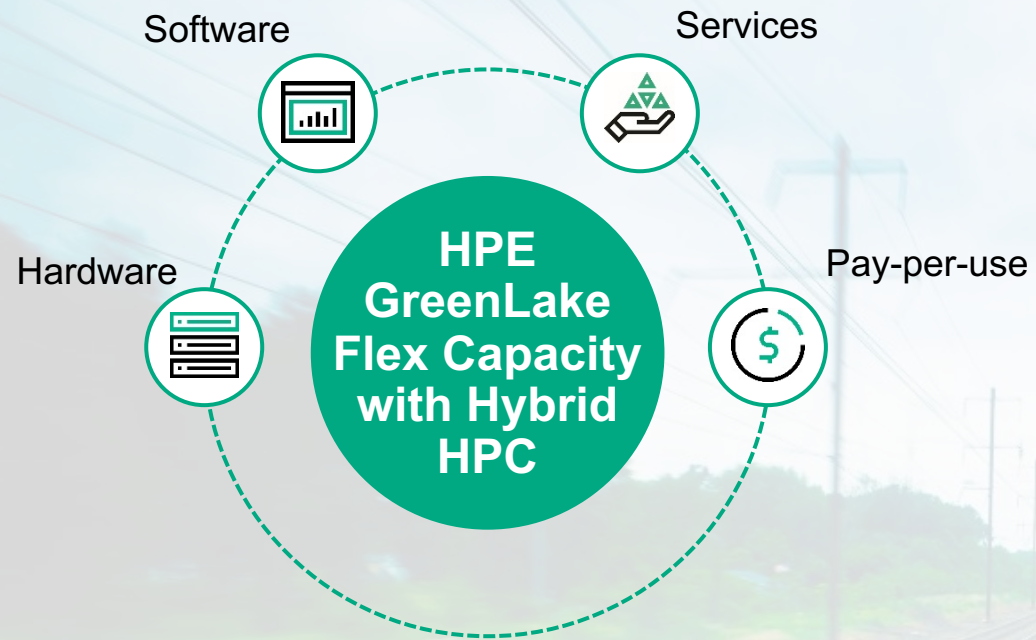

Containers on demand

Consume your Docker platform

Hybrid HPC

Just consume performance

HPE Apollo clusters

Defined to your needs

HPC Infrastructure software

Tailored for bare metal performance

Operated for you

to free your teams for more valuable contribution

HPE Expertise

Faster time to value: design, implement, train

Storage on demand

Storage always ready, performance tuned

Dansk Supermarked Group

Dansk Supermarked Group thrives in a tough retail environment by partnering with HPE to turn transform its IT bottleneck into an engine of business agility. Harnessing Big Data delivered via HPE GreenLake Flex Capacity and backed by HPE Datacenter Care for competitive success, Denmark's largest grocer keeps a close eye on customer preferences and its own operational efficiencies.

SOGETI

With its latest infrastructure nearing end-of-life Sogeti, a service provider who's wholly-owned subsidiary of Capgemini, looked for a flexible and cost-effective solution to replace it. With HPE GreenLake Flex Capacity, an IT consumption model, Sogeti pays for what it consumes, and scales up capacity instantly – when its customers demand it.

Why HPE GreenLake Flex Capacity is unique

Public cloud with the benefits of on-premises IT

Unlike a public cloud

On premises, with control over privacy, compliance, latency, and security; choose your technology

Unlike product financing

Active capacity management; variable payments based on actual metered usage; personalized global support

Unlike other “utility” offers

Include your whole IT estate-server, storage, networks, software; cloud services; not tied to one vendor

Consumption-based infrastructure

Active capacity management

- Start fast with modular choices
- Capacity ready in minutes, not months from onsite buffer
- Refreshed with simple change order
- Say “yes” to next project or customer

Variable payment

- Meet or beat cloud costs
- No up-front capital
- Pay only for metered capacity that you use
- Eliminate the cost of overprovisioning
- HI-med – low variability
- Align IT cost to business demand

Simplified IT operations

- Personalized support tailored to needs
- Optional remote monitoring & mgmt.
- Share utilization risk with HPE
- Free up IT staff to focus on innovation

Hybrid IT – ready

- Scale using certain Azure services
- Support for HPE ProLiant for Azure Stack
- One contract, one invoice, one usage portal
